PROFESSIONAL SUMMARY

Web Application Developer with more than 4 years of experience delivering responsive, high-performance web applications across multiple domains in a service and consulting environment. Hands-on expertise in Next.js 14, React.js, JavaScript (ES6+), and Tailwind CSS, with a strong focus on pixel-accurate UI implementation. Also experienced in backend development with Python and FastAPI, building RESTful APIs with CRUD operations. Comfortable working across the full frontend delivery cycle — from translating design mockups into production-ready interfaces to integrating REST APIs and collaborating with cross-functional teams in Agile environments. Known for writing clean, maintainable code and bringing a performance-conscious mindset to every feature shipped.

SKILLS

- **Languages & Core Technologies**: JavaScript (ES6+), TypeScript, HTML5, CSS3, AJAX, JSON, Python, FastAPI
- **Frameworks & Libraries:** React.js, Next.js, Tailwind CSS
- **Version Control & Workflow:** Git, GitHub, JIRA, Agile/Scrum
- **Testing:** Jest, React Testing Library,
- **Other:** RESTful API integration, Agile/Scrum, SQL
- **Tools**: GitHub Copilot, Figma

EXPERIENCE

Frontend Developer | ShiftBoolean - India (Remote) *10/2023 - 03/2026*

- Developed and maintained production-grade web applications for multiple clients in a service and consulting environment, using Next.js 14, React.js, JavaScript (ES6+), HTML5, CSS3, and Tailwind CSS.
- Built the responsive multi-page Shift Boolean corporate website (https://shiftboolean.com) end to end, with a Next.js frontend and a Python FastAPI backend.
- Designed and developed RESTful APIs with FastAPI, implementing CRUD operations and using an ORM/ODM layer for data modeling and database interactions with MongoDB.
- Integrated FastAPI REST APIs with the Next.js frontend to render dynamic content and ensure smooth data flow.
- Developed the frontend of RidingMoto, a product website for an IoT-based vehicle tracking platform, improving responsiveness, UI consistency, and code standards.
- Implemented pixel-accurate, mobile-first layouts with Tailwind CSS, ensuring consistent rendering across desktop, tablet, and mobile devices.
- Optimized performance using Next.js App Router, Server-Side Rendering (SSR), Static Site Generation (SSG), and next/image.
- Improved SEO and organic search visibility across client web properties by implementing the Next.js Metadata API.
- Built reusable, modular React components to reduce code duplication and speed up delivery across projects.
- Used GitHub Copilot effectively across frontend and backend development to accelerate coding, generate boilerplate, write tests, and debug, improving productivity while maintaining code quality.

Software Engineer | SS Infomate - India (Remote) *11/2022 - 09/2023*

- Developed and maintained responsive UI components using React.js for a healthcare web application serving US-based end users.
- Built reusable React components and integrated RESTful APIs to support features like patient records, appointment scheduling, or dashboards.
- Collaborated with backend developers and US-based stakeholders in an Agile/Scrum environment to translate requirements into functional UI features.
- Debugged and resolved UI/UX issues and production bugs, improving application stability and reducing client-reported defects.
- Worked closely with QA team to identify, reproduce, and fix bugs during sprint cycles, contributing to on-time releases.

EDUCATION

Bapurao Deshmukh College of Engineering - Wardha, Maharashtra *05/2018*
Bachelor of Engineering: Civil Engineering
